Crossbow Education Duo Eye level Reading Rulers- Pack of 10 Yellow

Description

A coloured overlay filter and text highlighter about the size of an eight-inch ruler. It is discreet and professional-looking and can be kept in a book as a bookmark for easy storage. The Duo reading ruler is made of a combination of opaque and transparent plastic that both underlines the text and highlights it in a coloured tint. Simply read the text through either of the tinted plastic strips of your selected colour, and track down the page: broad strip for paragraphs; narrow strip for single lines.

Visual Stress is also known as Meares-Irlen Syndrome. Visual Stress is often experienced by people with dyslexia, but is a separate and distinct condition. Apparent movement and distortion of text, headaches and sore eyes are common symptoms of visual stress.
Reading Rulers can assist reading and can be used as an alternative to full page overlays.
