

## Medigenic Infection Control Medical Keyboard and Mouse

Part code: K-MC-KB (keyboard only),  
K-MC-KBM (keyboard with mouse)

*Images not to scale*

### Description

The Medigenic Essential Infection Control Medical keyboard is fully approved to IP65 and certified to work in hospitals and medical environments. Strong arguments for improved infection-control methodology are evident where computer keyboards collect biological contaminants and require attention to maintain disinfection. The Medigenic Essential Infection Control Medical keyboard includes a flashing indicator light and audible alarm to alert users to clean the keyboard at timed intervals.

- Uniquely helps monitor its own cleaning status to safeguard both patient and staff
- Fully NHS Approved Keyboard
- Patented Clean-Me Alert System
- Integrated Backlighting
- Features a flat design to enable quick wipe downs with hospital-grade disinfectants
- Provides standard conventional keyboard tactile feedback for high-speed data entry capability
- The interval on the cleaning alert has been preset at twelve hours. This can be changed via the settings to any time that suits the environment

### Specifications
