

Olympus DS9500 Premium Kit

Two microphones ensure flawless speech quality in every situation. Use WiFi to share your files from the DS-9500.

Record Conferences in Stereo

The two microphones into a 90° layout enable high quality recording in a realistic stereo feeling. You can then quickly and easily share the MP3 file with others

Dictation Mode for Quiet Environment

No matter from which angle you speak into the device, the omni-directional microphones pick up your voice accurately. In this mode, you can hold the device in your hand any way you like.

Dictation Mode for Noisy Environment

The main microphone is recording in a high directionality mode together with noise cancellation in order to focus on the voice. The noise from the surroundings will be suppressed to a minimum

Built-in Wi-Fi

Connect your new Olympus DS-9500 recorder to a wireless network, (phone hotspot / wireless router) and send your files from anywhere. Authors no longer need to carry a PC to download the dictations.
