

Contour Balance Keyboard

Description

Specifically designed to fit the RollerMouse Red, Red Plus, and Free3, the Contour Balance Keyboard puts your hands in the perfect typing and mousing position. By using Balance Keyboard with a RollerMouse, it brings you and your workstation closer together.

Balance Keyboard's adjustable legs and tilt options allow for easy adjustability into negative, neutral, and positive typing angles.

Balance Keyboard's media keys perform useful everyday tasks and can easily be programmed to suit your specific needs. Traditional function keys (F1-F12) are also available, and easily accessible through the Fn lock feature.

Balance Keyboard is wireless and runs on 2 x AAA batteries. It connects to your PC or Mac using its own USB wireless receiver, which is securely stored in the battery housing when not in use.

Balance Keyboard does not need an on/off switch, thanks to its smart, power-saving technology.
