

## ProStand

The #1 integrated MacBook laptop stand

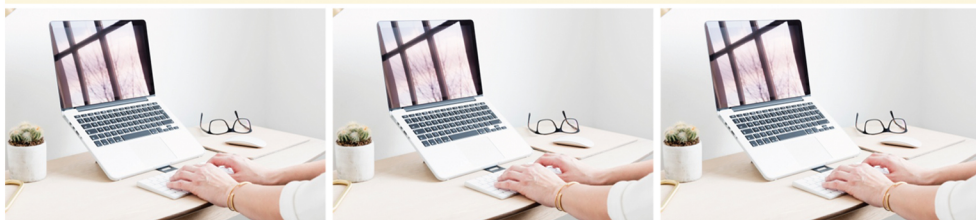

The laptop stand that you only have to attach to your MacBook once, so you'll never forget it.

This integrated laptop stand creates a healthy working posture. The MacBook can be set to the right height to alleviate the strain on your neck and make your work more comfortable.

According to the Dutch Working Conditions Regulation (art. 5.1), you cannot use a laptop (without accessories) for more than two hours per day. A laptop has an integrated keyboard and screen. When you use an external keyboard and mouse, this legal limit of two hours does not apply.

### Our first ergonomic MacBook accessory

"The ProStand is perfect for flexworkers. No matter where you work, this laptop stand will allow you to create an ergonomic workspace anywhere and anytime. Furthermore, the ProStand provides additional protection for your MacBook. The seamless design of the stand ensures it perfectly suits your MacBook's modern look. This is because the ProStand was specifically designed for the MacBook Pro 13 inch models."

## Advantages of the ProStand

### Ergonomic

The ProStand can easily be adjusted to one of the three available height settings. You can raise the top of your screen up to a comfortable height.

### Ideal

With its clip-on design, you can attach the laptop stand to your MacBook. This allows you to create an ergonomic workspace wherever you are.

### Design

The laptop stand's sleek design perfectly matches your MacBook. Since it only weighs 125 grams (4.5oz), you will forget you even have it with you.

### Protection

Besides allowing you to work ergonomically, the ProStand also protects your MacBook against minor bumps and damage.

### Workspace

The ProStand can easily be adjusted to the right height, so you can use your MacBook as a second screen.

### Functional

The ProStand is designed to preserve all of your MacBook's functionalities. It does not block your MacBook's ports and ventilation outlets.

## Knowledge Center

Organisations achieve results in the same way as professional athletes: They spend years completely dedicated to improvement in order to excel at certain moments.

This whitepaper focuses on practical ways that organisations and their employees can use insights gleaned from professional sports in order to improve work performance and ...
