

Comfort Leg Rest

Features:

- ✓ Height and Angle Adjustable
- ✓ Rotates 360 Degrees
- ✓ Various Height Ranges are Available
- ✓ Choose Between Single or Double Width - Single to Support One Leg or Double to Support Both
- ✓ Standard Height Range of 40-50cm

The comfort leg rest is designed to relieve pressure and strain by acting as a platform for your leg to rest on. It is ideal for knee joint pain and inflammation as it enables the leg to be straightened instead of the bent position associated with normal sitting. Users that suffer from knee problems such as arthritis or ligament damage find the comfort leg rest particularly beneficial.

The comfort leg rest is available in both single (one leg) and double (both legs) sizes. Each one is height and tilt adjustable for the exact leg positioning required. The standard leg rest height range is 40-50cm but if you require a different height please get in touch.

Width – 25 cm (Single) 47 cm (Double)

Depth – 47 cm

Height – 40-50 cm
