Meticulously designed by their team of optometrists to enhance well-being, alleviate headaches and migraines, shield eyes from strain, and block up to 100% of harmful blue light. Ocushield Amber Glasses are designed for nighttime, making them ideally suited for bedtime scrollers, Netflix bingers, troubled sleepers, late night drivers and individuals seeking better sleep.

The Amber Night Glasses block 100% blue light filtration, regulating the body's natural sleep/wake cycle. Their anti-glare and anti-reflective coating also protect against headlight glare, ensuring a safer nighttime driving experience.

What is Blue Light?

Blue light is a segment of the visible light spectrum responsible for keeping you alert. It's naturally present in sunlight but is also concentrated in the light that comes out of your digital devices – phones, tablets, laptops, everything! And that's not a good thing.
