

ZoomText Magnifier v11 – Download

ZoomText Magnifier is an advanced screen magnification program that enlarges and enhances everything on the computer screen, making your computer easier to see and use.

Features

xFont technology displays high-definition text that's easy to read at all magnification levels. Smooth, bold and condense settings allow you to fine-tune the thickness and spacing of text.

8 different zoom windows allow you to choose which part of the screen is magnified.

Innovative colour controls improve screen clarity and reduce eyestrain. Special effects include colour dyes, two-colour modes and replacement of problem colours.

Size and colour enhancements make it easy to see the mouse pointer. Special locators make it easier to follow the mouse pointer and text cursor as they move across the screen

Focus enhancements makes it easy to locate and follow the control focus when you navigate through application menus, dialogs and other application controls.

Dual Monitor Support - Use two monitors to expand your magnified viewing area, or use the second monitor to share a magnified or unmagnified view of your desktop with another person or group.

ZoomText Camera feature allows you to use any high-definition (HD) webcam to view and magnify items on your computer screen – bills, magazines, photographs, medicine labels, craft items, etc.

Save unique settings for each application that you use. As you switch applications, ZoomText automatically loads the desired settings.

New Smart Invert

See photos as they were meant to be seen in Internet Explorer 11. With ZoomText's new Smart Invert feature, photos are displayed in their natural colours when ZoomText's Invert Brightness and Invert Colours are active.

New Unified Finder Tool

Locating what you are looking for is easier than ever with the new Finder Tool. Finder lets you search and skim through documents, web pages and email to instantly find any word or phrase you are looking for. You can search through all of the text or only within specific items like headings, forms, links and images.

New Zoom to 1x

The new Zoom to 1x feature lets you instantly switch between zoomed and 1x views, without having to zoom out and zoom back in one zoom level at a time.

New Command Keys

ZoomText 11 has a new system of "Command Keys" that are easier to learn and use. The new command keys also eliminate conflicts and compatibility issues that existed in previous versions of ZoomText.

New Modern Toolbar

ZoomText has a brand new toolbar with a fresh clean look. You can access and operate the entire toolbar with the keyboard or the mouse.

New Geometric Smoothing

ZoomText now smooths the edges of text and graphics in places where xFont magnification can't go.

New Consolidated AppReader

Automatic reading now more efficient and flexible by combining ZoomText's legacy reading tools into one new AppReader. With the new AppReader you can read right in the target application or switch on-the-fly to the high contrast text view that's better for visual reading

Requirements

- Windows 10, 8.1 or 7 with Service Pack 1 (or later).
- Processor: 2 GHz i3 dual core processor or similar. i5 or i7 recommended.
- 4 GB Ram. 8 GB recommended.
- Video card with support for DirectX 10 or higher.
- Recommended: 256 MB dedicated video memory.
- 400 MB hard drive space. SSD drive recommended.
- 5-point multi-touch display for touch screen support.
- USB 2.0 for ZoomText Camera support.
- Internet connection for download
