| | K-M-2H-TB | (with trackball, L89 layout, Sculpted) |

Description

Maltron Ergonomic Keyboards are designed to fit natural hand positions to reduce the strain on the tendons of the forearm. By using a Maltron anti RSI keyboard, the result for the many users who have adapted to this layout, is a substantial reduction of pain and often a recovery of their career prospects. Although not everyone is freed of all problems, the majority do benefit. A flatter version of the product is also available (see part codes listed in the table below)

Specifications:

| | |
|-----------------------|-------------------------------|
| Width: | W: 43cm, D: 22cm, H: 10cm |
| Weight (trackball): | 1.0kg |
| Weight (no trackball) | 0.9kg |
| Connectivity: | USB |
| Cable Length: | 2.0m (approx) |
| Compatibility | PC and Mac depending on model |

Layout 89 and Layout 90 Differences

L90 series keyboards.

90 series keyboards are an updated layout design from the older 89 design, and are recommended for new Maltron users as the layout most closely resembles the conventional keyboard you will be familiar with. Number positions are more like the conventional flat keyboard you will know, except for the escape key which is in the central number area.

L89 series keyboards.

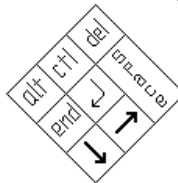

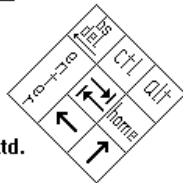

89 series keyboards have an older layout design. They are recommended for those who have used an 89 series Maltron keyboard before and wish to avoid learning the slightly different layout of a 90 series keyboard. The 89 series was optionally available with a PS/2 connector (known as J89) or USB connector (known as L89). It is now only available with USB.

If you have one of our earlier keyboards it is most likely that it has layout-89. The diagrams below show the important differences.

- To confirm the layout of a Maltron keyboard you already have, look at the QWERTY row of letters. If the number 2 is above the letter W then the keyboard has layout 89.
- If the number 2 is above the letter Q then the keyboard has layout 90.

QWERTY 89 Layout

| | | | | | | | | | | | | | | | | | | |
