

HandShoe Mouse

The user friendly HandShoe Mouse is an ergonomic mouse available in 3 standard sizes: small, medium and large. The HandShoe Mouse is plug and play; no special drivers for Mac or PC are needed. Controls consist of 2 buttons at an ergonomic position and a scroll wheel fitted with a switch mechanism.

Specifications

- USB Connected
- Rechargeable Wireless and wired options available
- Supported by Windows 95, 98, 2000, NT, XP, Vista, Mac OS 9, Mac OS X and Unix
- Resolution: BlueRay Track Light Click (LC): 1500

Part Numbers

Wired Right Handed

- M-H-RH-17B small - right-handed - wired
- M-H-RH-19B medium - right-handed - wired
- M-H-RH-21B large - right-handed - wired

Wired Left Handed

- M-H-LH-170 small - left-handed - wired
- M-H-LH-190 medium - left-handed - wired
- M-H-LH-200 large - left-handed - wired

Wireless Right Handed

- M-H-RH-17W small - right-handed - wireless
- M-H-RH-19W medium - right-handed - wireless
- M-H-RH-21W large - right-handed - wireless

Wireless Left Handed

- M-H-LH-17W small - left-handed - wireless
- M-H-LH-19W medium - left-handed - wireless
- M-H-LH-20W large - left-handed - wireless

Which Size?

Measure on the inside of the stretched out hand, distance from wrist up to the top of the ring finger. This length provides an indication of the required size.

- Length up to around 170mm: Small
- Length from around 170 to 190mm: Medium
- Length of 190mm and above: Large

Research

The objective of the development was to realise a contour which allows for a relaxed hand position. The resulting shape of the HandshoeMouse fully supports the hand. Only a minor contraction of the muscles of the fingers is required to operate the switches and scroll wheel. Arms and hands remain in a relaxed position. This is contrary to a conventional computer mouse which requires continuous lifting of the fingers and thus muscle action.
